Data Science Lab: Stock & Revenue Visualization

This downloadable report contains your fully generated laboratory dashboard along with the comprehensive python source code to reproduce your results cleanly in any offline environment.

1. Generated Graphical Dashboard Output

2. Production Code Block (Matplotlib & Pandas Pipeline)

```
# Fully Automated Dashboard Rendering Code Pipeline
import pandas as pd
import matplotlib.pyplot as plt

def make_graph(stock_data, revenue_data, stock):
stock_sorted = stock_data.sort_values(by="Date")
rev_sorted = revenue_data.sort_values(by="Date")
```

```
fig, (ax1, ax2) = plt.subplots(2, 1, figsize=(10, 8), sharex=False)
fig.suptitle(f"{stock} Historical Stock and Revenue Dashboard", fontsize=16, fontweight='bold')

# Historical Share Price Track
ax1.plot(pd.to_datetime(stock_sorted['Date']), stock_sorted['Close'].astype(float),
color='#007acc', linewidth=2.5)
ax1.set_title("Historical Share Price")
ax1.set_ylabel("Price ($US)")
ax1.grid(True, linestyle='--', alpha=0.5)

# Historical Revenue Track
ax2.plot(pd.to_datetime(rev_sorted['Date']), rev_sorted['Revenue'].astype(float),
color='#ff7f0e', linewidth=2.5)
ax2.set_title("Historical Revenue")
ax2.set_xlabel("Date")
ax2.set_ylabel("Revenue ($US Millions)")
ax2.grid(True, linestyle='--', alpha=0.5)

plt.tight_layout()
plt.show()

# Execution Call
make_graph(gme_data, gme_revenue, 'GameStop')
```
